Supply

Sell>> Erdos Xijin Company supplies ferrosilicon (70#,72#,75#) & special ferrosilicon (low Al, low Ti, low C), Sales Manager, Mr. Ning, 15049433766/18147786766

Sell>> Wuhai Junzheng Group sells ferrosilicon, 72#, 75#, Mr. Zhou, 13327036330

Sell>> Tengda Northwest Ferroalloys Group supplies silicon, chrome and manganese products

Sell>> Baotou Oma company sell ferrosilicon, Mr. Fang 86-13901139228

Sell>> Sanyuan Zhongtai Company sell ferrosilicon, Mr.Di86-13739507897

Sell>> Inner Mongolia Sanwei company Mr. Zhang 86-13614820288

Sell>> Ningxia Juhe Silicon Company Mr. Chen 86-13909598844

Sell>> Zhongwei Maoye Metallurgy company sell ferrosilicon Mr. Huang 13629555885

Sell>> Zhongwei Dayou Metallurgy company Mr. He 86-18709559808

Sell>> Zhongwei Yuexin Steel supply ferrosilicon 72#、75#、size10-50、10-80、50-10mm, Ms. Xiao 86-18795356999

Sell>> Zhongwei Tianze Metallurgy supply ferrosilicon65#70#72#75#, low Al0.02.Zhang Yue 86-18995453096

Sell>> Ningxia Xinkangsheng supply ferrosilicon, carbon raiser etc Mr. Ma 86-18395094491

Sell>> Ningxia Ruitaixiang company supply ferrosilicon 60# 65# 66# 72# 75# Ms. Wang 86-15809631594

Sell>> Aerbadi (Ningxia) Smelting Co., Ltd supply ferrosilicon 72# 75#, natural block, Mr. Chen, 17395155168, Mr. Liu, 17391519151

Sell>> Qinghai Wutong Industry Mr. Lee 86-13997034020

Sell>> Qinghai Huesheng Ferroalloy Co., Ltd, Mr. Chen 86-18697160185

Sell>> Qinghai Fuxin Silicon Mr. Gan 86-18097239888

Sell>> Gansu Honest special ferrosilicon Mr. Dai86-13919058339

Sell>> Gansu Tianyikuangye company special ferrosilicon, normal ferrosilicon etc, Mr.Zhang 0931-2155553

Sell>> Lanzhou Hongye Company high purity ferrosilicon ($Si \geq 75\%$ $Al < 0.1\%$ $Ca < 0.02\%$, $C < 0.02\%$, $Ti < 0.05\%$ -0.01% etc.),supply all types of ferrosilicon and size under 0-3 mm, size(10-50mm, 3-10mm)Si 72#powder(0-3mm),Mr. Shi 86-13309408708

Demand

Buy>> Shanxi Shenmu Dongfeng Magnesium Co.Ltd., Chen Jiashuai, 13772375803

Buy>> Shandong Xiangcheng Metallurgical Furnace Charge Co. Ltd., Mr. Li, 13963341489

Buy>> Jiangsu Zhongzaixin Metallurgical Furnace Charge Co. Ltd., Mr. Song, 15861080167

Buy>> Henan Anyang Zhenhuan Metallurgical Refractories Co. Ltd., Mr. Li,

13949530398

Buy>> Boyu Metal Corporation, Ms. Tong, 15242409770

Buy>> Beijing LY Metals and Mining Co., Ltd, Mr. Zhao, 18513433578

Buy>> Shanxi Orient Henglv Investment Casting Co., Ltd, Mr. Mou, 18636705861

Buy>> Silicon 68-72, Barium 4-6, granularity 0.2-0.8, 5-15, 3-8 or natural block, Mr. Chen, 13909598844

Market Insight

- **Baowu Steel set to buy majority stake in peer**

China Baowu Steel Group, the nation's largest steelmaker, is approaching its target of becoming a global industry leader with an annual output of 100 million metric tons as it intends to acquire a controlling stake in Chongqing Iron and Steel Co Ltd.

Shanghai-listed Chongqing Iron and Steel announced on Friday in a statement that its actual controller, Four Rivers Investment Management Co Ltd, had signed a letter of intent with China Baowu on transferring the controlling stake in the steelmaker.

According to the statement, China Baowu would take the controlling stake in Chongqing Iron and Steel through a share purchase. The deal is expected to be completed by the end of next June.

In its development scheme published in November 2017, China Baowu set a goal of expanding its output from 80 million tons to 100 million tons between 2019 and 2021.

China Baowu, a monolith formed by the merger of Shanghai-based Baosteel Group and Wuhan Iron and Steel Group in Central China's Hubei province in December 2016, is the nation's most competitive steelmaker with a production capacity of 70 million tons, second only worldwide to the Luxembourg-based ArcelorMittal.

The steel mill keeps expanding its scale. In June this year, it announced it would acquire Maanshan Iron and Steel Co Ltd (Magang), whose output of crude steel totaled 19.64 million tons in 2018.

"Magang has 20 million tons of steel capacity, and its unique product portfolio will extensively consolidate Baowu's strengths and increase its output to more than 90 million tons," said Chen Derong, chairman of China Baowu.

Chongqing Iron and Steel, established in 1997, went through a mixed ownership restructure at the end of 2017, according to ThePaper.cn report. Four Rivers is a fund launched in 2017 committed to forwarding the steel industry's restructuring and

upgrade.

Baowu's Hwabao Investment Co Ltd and US-China Green Fund originally held 25 percent each in the fund. WL Ross & Co owned 26 percent and China Merchants Finance Holdings Co Ltd held the remaining 24 percent.

By 2025, the country's top 10 steel enterprises will have their combined output contribute between 60 percent and 70 percent of the nation's total, among which, the top three or four companies' annual capacity will reach 80 million tons each, according to the target set by the State Council.

● **AISI: Steel Imports Down 17% Year-to-Date through November**

Based on preliminary Census Bureau data, the American Iron and Steel Institute (AISI) reported today that the U.S. imported a total of 1,541,000 net tons (NT) of steel in November 2019, including 1,311,000 net tons (NT) of finished steel (down 29.9% and 12.5%, respectively, vs. October final data). Through the first eleven months of 2019, total and finished steel imports are 26,332,000 and 19,675,000 net tons (NT), down 17.3% and 18.1%, respectively, vs. the same period in 2018. Annualized total and finished steel imports in 2019 would be 28.7 and 21.5 million NT, down 14.8% and 16.5%, respectively, vs. 2018. Finished steel import market share was an estimated 15% in November and is estimated at 19% over the first eleven months of 2019.

Key finished steel products with a significant import increase in November compared to October are cut lengths plates (up 46%), hot rolled bars (up 24%), standard pipe (up 13%) and line pipe (up 12%).

In November the largest volumes of finished steel imports from offshore were from South Korea (188,000 NT, up 11% from October final), Japan (85,000 NT, up 14%), The Netherlands (70,000 NT, up 131%), Germany (55,000 NT, down 30%) and Taiwan (31,000 NT, down 21%). For the first eleven months of 2019, the largest offshore suppliers were South Korea (2,408,000 NT, down 10% vs. the same period in 2018), Japan (1,175,000 NT, down 9%), Germany (965,000 NT, down 21%), Taiwan (799,000 NT, down 21%) and Vietnam (650,000 NT, down 36%).

● **China's coal mines report steady safety improvement**

Production safety of China's coal mines has continuously improved over the past 20 years, with thorough safety supervision and better industrial structure.

The death toll in coal mine accidents declined from 6,995 in 2002 to 333 in 2018, down 95.2 percent, while the number of major accidents dropped to two in 2018, 97.4

percent lower from the reading of 76 in 1999.

China established a vertical supervision system in coal mine safety in 1999, involving governments at various levels.

Supervision authorities nationwide have completed 139,000 inspections since 2012, investigating 817,000 general safety risks, 5,369 major safety risks and halting production of 3,360 operations.

The country optimized the industrial structure by shutting down small coal mines failing to meet safe production requirements. The number of coal mines was reduced from 34,000 in 2000 to 5,700 in 2018, with total annual capacity almost tripling from 1999.

The mechanization rate of coal mine production has reached 78.5 percent, said Shang Dengying, an official with the National Coal Mine Safety Administration.

China has taken measures to improve the underground working environment and will introduce robotics technology to facilitate increased safety levels.

● **US Steel Postpones CRNGO Investment in Košice**

The Spectator reported that as a consequence one of three blast furnaces in the steelmaker US Steel Košice remains idle and some planned investments are being postponed. US Steel Corporation in its outlook report for the fourth quarter said “Economic indicators in the region suggest difficult market conditions are likely to continue in 2020. Based on this assessment, one of the three blast furnaces remains idle and the company has postponed the dynamo line investment spending in 2020.”

The corporation does not specify until when the investment will be postponed, while it promises to continue to be flexible and execute the investment as market conditions warrant.

In mid January 2019, USSK announced an investment of USD 130 million in a new non-grain oriented electrical steel line, also called a dynamo line, in Košice. Its production capacity is projected at 100,000 tons per year. Its construction was to start. The new line was to enable production of sophisticated silicon grades of NGO electrical steels to support increased demand in vehicles and generators.

Daily Market

Brief Market Analysis

The spot market of ferrosilicon showed stable and the main steel mills are purchasing.

Ferrosilicon futures 2005 contract

1. Futures warehouse: The number of warehouse receipts was 5431 (27155 tons), and 2988 (14940 tons) were valid for the number of warehouse orders.
2. The 2005 ferrosilicon contract price on ZCE closed at 5834 yuan per tonne on January 2.
3. The main position: the top 20 positions increased and decreased varied, the purchase volume is less than the holding position.

Below are ferrosilicon futures main contract 2005 daily specific performances:

International Data

- **China exported 20410.62 tons of ferrosilicon (>55%) in November**

According to the data released by China Customs, for the month of November, 2019, China exported a total of 20410.62 tons of ferrosilicon (>55%), up by 3.34% vs. October, 2019 and down by 52.21% vs. the same period in 2018.

In November, China exported 7765.124 tons of ferrosilicon (>55%) to Japan, which accounts for around 38.04% of the total exports in November of China, and exported 5819 tons to Korea, which accounts for around 28.51%.

- **China exported 329311.461 tons of ferrosilicon (>55%) from January to November, 2019**

According to the data released by China Customs, China exported a total of 329311.461 tons of ferrosilicon (>55%) from January to November, 2019, down by 39.12% vs. the same period in 2018.

Through the eleven months, China exported 106941.781 tons of ferrosilicon (>55%) to Japan, which accounts for 32.47% of the total exports in the first eleven months in 2019, and exported 84484.1 tons to Korea, which accounts for around 25.65%.

- **China exported 2654.15 tons of ferrosilicon (\leq 55%) in November**

According to the data released by China Customs, for the month of November, 2019, China exported a total of 2654.15 tons of ferrosilicon (\leq 55%), up by 25.67% vs. October, 2019 and down by 5.92% vs. the same period in 2018.

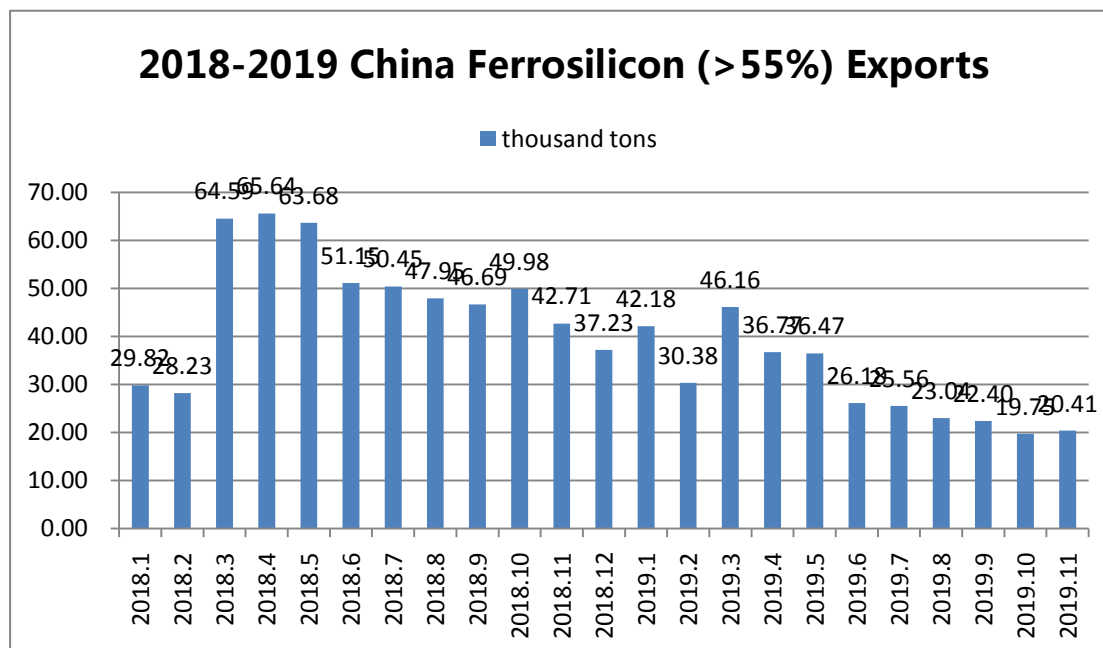

In November, China exported 1043.05 tons of ferrosilicon (\leq 55%) to Korea, which accounts for around 39.299% of the total exports in November of China, and exported 410.1 tons to Japan, which accounts for around 15.45%.

- **China exported 28681.161 tons of ferrosilicon (\leq 55%) from January to November, 2019**

China exported a total of 28681.161 tons of ferrosilicon (\leq 55%) from January to November, 2019, down by 6.55% vs. the same period in 2018.

Through the eleven months, China exported 9610.1 tons of ferrosilicon (>55%) to

Korea, which accounts for 33.51% of the total exports in the first eleven months in 2019, and exported 6397.875 tons to Japan, which accounts for around 22.31%.

- **Korea imported 18858 tons of ferrosilicon (>55%) in November**

According to data of Korea Customs Service, for the month of November, Korea imported 18858 tons of ferrosilicon (>55%), up by 30.04% vs. the same period in 2018.

In November, Korea imported 10743 tons of ferrosilicon (>55%) from China, up by 4.81% vs. the same period in 2018.

- **Japan imported 30157.42 tons of ferrosilicon (>55%) in November**

For the month of November, Japan imported 30157.42 tons of ferrosilicon (>55%), including 11717.398 tons from China, which accounts for around 38.85%.

From January to November, Japan imported 395792.067 tons of ferrosilicon (>55%), including 119419.575 tons from China, which accounts for around 30.17%.

- **Japan imported 2627.85 tons of ferrosilicon (\leq 55%) in November**

For the month of November, Japan imported 2627.85 tons of ferrosilicon (\leq 55%), including 405.1 tons from China, which accounts for around 15.42%.

From January to November, Japan imported 18251.476 tons of ferrosilicon (\leq 55%), including 6825.958 tons from China, which accounts for around 37.4%.

● **World Steel Association: November 2019 crude steel production**

World crude steel production for the 64 countries reporting to the World Steel Association (worldsteel) was 147.8 million tonnes (Mt) in November 2019, a 1.0% decrease compared to November 2018.

China's crude steel production for November 2019 was 80.3 Mt, an increase of 4.0% compared to November 2018. India produced 8.9 Mt of crude steel in November 2019, down 2.8% on November 2018. Japan produced 7.7 Mt of crude steel in November 2019, down 10.6% on November 2018. South Korea's crude steel production was 5.9 Mt in November 2019, a decrease of 0.5% on November 2018.

In the EU, Italy produced 2.0 Mt of crude steel in November 2019, down by 9.8% on November 2018. France produced 1.1 Mt of crude steel in November 2019, an 18.2% decrease compared to November 2018. Spain produced 1.1 Mt of crude steel in November 2019, down by 10.9% on November 2018.

The US produced 7.2 Mt of crude steel in November 2019, a decrease of 2.2% compared to November 2018.

Brazil's crude steel production for November 2019 was 2.6 Mt, down by 10.5% on November 2018.

Turkey's crude steel production for November 2019 was 2.9 Mt, down by 8.1% on November 2018.

Crude steel production in Ukraine was 1.3 Mt this month, down 20.1% on November 2018. (worldsteel)
